Free Azure Health Check

Optimize Your Azure Environment with Actionable Insights

Is your Azure environment optimized for security, cost, and performance? VIAcode's Azure Health Check provides a fast, AI-powered analysis that identifies inefficiencies, enhances security, and reduces cloud waste – typically identifying potential savings of about 30%.

The Azure Health Check provides you with insights into your current Azure state and delivers prioritize, actionable recommendations (based on over 2000 proven strategies and best practices) that typically identify about 30% savings potential and both security and operational gaps. VIAcode's Azure Health Check, powered by vBox and **supported by Microsoft**, helps to improve operational efficiency, mitigate cloud waste, enhance security and ensure streamlined and cost-effective Azure management.

Cost Management & Optimization

VIAcode's Azure Health Check goes well beyond Azure Advisor and other information in the Azure portal to help identify inefficiencies, ensuring your resources are cost optimized while still supporting the business needs. It leverages proven and proprietary cost optimization strategies to deliver a prioritized list of recommendations that enable you to reduce cloud waste and unnecessary expenses. By improving budgeting, forecasting, and cost accountability, it enables better alignment between cloud investments and business priorities. Gain full visibility into spending trends and implement proven cost-saving strategies to optimize your Azure investment.

Security

The Azure Health Check takes a snapshot of your current Azure security posture and delivers a Secure Score as a benchmark. This score acts as a barometer to gauge your readiness in mitigating risks such as vulnerabilities in your security monitoring, permission over-granting and gaps in your defense-in-depth (DID) strategies. By providing a unique view of security data, it helps you prioritize action based on risk, user impact, and effort to improve your secure score, eliminate security gaps and enhance compliance.

Operations

Azure Health Check ensures your Azure environment is resilient and reliable by analyzing availability, backup and disaster recovery, and monitoring coverage. It identifies opportunities to enhance uptime and streamline backup and disaster recovery processes. These recommendations promote operational excellence by helping to minimize downtime, protect critical data and ensure business continuity, so your operations remain robust and uninterrupted.

Get Azure ARC Enabled for Free

If you're running in Azure but haven't enabled Azure ARC, VIAcode will do it for you – free of charge. By enabling Azure ARC, you can extend the benefits of the VIAcode Health Check to your on-premise environment. Plus, Azure ARC unlocks powerful capabilities, including streamlined inventory management, remote administration, automated security and compliance, VM lifecycle operations, and cost-saving licensing options. Let VIAcode handle the setup so you can focus on what matters most.

Powered by vBox

The Azure Health Check is powered by VIAcode's proprietary technology, vBox – a virtual cloud center of excellence in a box. vBox integrates Azure data collection, analytics, AI and workflow management to provide deep insights and unparalleled visibility into your cloud environment. Specifically designed for Azure, vBox delivers precise, prioritized, actionable recommendations for optimizing costs, strengthening security and enhancing operations. It also integrates with ticketing systems for recommendation implementation management, accountability and reporting. With vBox, your business gains the insights and tools needed to maximize the value of your Azure investment and the ability to prove results.

Effortless Setup

Setting up the Azure Health Check is fast and simple, typically taking about 10 minutes. Once deployed, Azure Health Check analyzes your Azure environment's metadata to deliver an in-depth analysis and establish a benchmark for your management practices. You'll receive a customized list of optimization recommendations prioritized by business impact, often identifying cost savings potential as well as both security and operational gaps.

VIAcode has earned the following Microsoft Solution Designations:

Microsoft Solutions Partner	Microsoft Solutions Partner	Microsoft Solutions Partner	Microsoft Solutions Partner	Microsoft Solutions Partner
Modern Work	Data & AI Azure	Digital & App Innovation Azure	Infrastructure Azure	Security
	Specialist Build AI Apps on Microsoft Azure	Specialist Migrate Enterprise Applications to Microsoft Azure	Specialist Infra and Database Migration	

About VIAcode

VIAcode has over 25 years of experience delivering Microsoft-branded solutions for management, operations and migration. Today, we are a Microsoft Managed Partner, Direct CSP and a software development partner of the Microsoft SQL and Azure Product Teams. We have earned five Microsoft solution designations and are one of only a few partners with Advanced Specialization in Azure Migration.
